GENERAL INFORMATION

ANIMATE is a premium blend of ammonium sulfate and nonionic surfactant formulated to optimize glyphosate and other herbicide activity.

ANIMATE optimizes herbicide performance by preventing hard water mineral antagonism of spray mixtures while providing faster wetting and spreading of spray droplets to enhance herbicide movement through the targeted plant surface.

ANIMATE enhances spray coverage, biological activity and absorption of herbicide product labels that recommend the use of ammonium sulfate and/or nonionic surfactants.

MIXING INSTRUCTIONS

Shake container well before use.

Fill spray tank 2/3 full of water and begin agitation. Unless instructed otherwise by accompanying herbicide label, add ANIMATE first to condition the water. Add remaining products as instructed by label or in the following sequence: 1) dry flowables or water dispersible granules; 2) wettable powders; 3) flowables; 4) solutions; 5) emulsifiable concentrates.

Continue agitation until spray solution is completely mixed. If spray solution has been allowed to stand, thoroughly agitate to remix prior to application.

ANIMATE is Manufactured for Aspect Ag, LLC

DIRECTIONS FOR USE
